

BLAZER SIDE

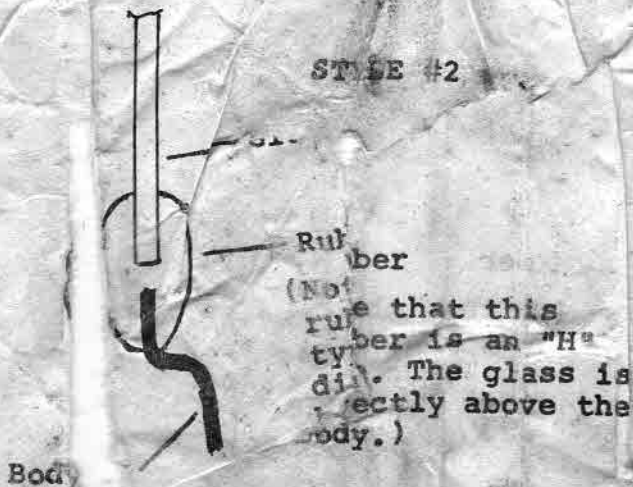

THERE ARE TWO STYLES OF BLAZER ROOFS WITH DIFFERENT WINDOW CONFIGURATION OPENINGS.

STYLE #1

(Note that this rubber is an "S" type. The glass is offset from the body.)

STYLE #2

(Note that this rubber is an "H" type. The glass is directly above the body.)

For installing the Blazer Sliding Side Window in STYLE #2 body it is necessary to beaming 3/16 inches FOUR SIDES. This is a saber saw or jig

Install the Sliding Side Window the same way as installing the glass. The inside flange of the rubber will compress to fit.
