

MUSTANG II UPPER & LOWER A-ARMS

Economy Upper
A-Arms (Pair)

Finally, Mustang II Full A-Arms for the budget builder. Heidt's Hot Rod Shop has designed cost conscious control arms for the builder who does not require the high tech look of tubular control arms but wants the ease of installing custom full A-Arms on his Mustang II I.F.S. The upper arms are a direct replacement for factory arms. The lower A-Arms have the same wide triangulated spread that Heidt's full tubular lower A-Arms do, so they need no strut rods.

Economy Lower
A-Arms (Pair)

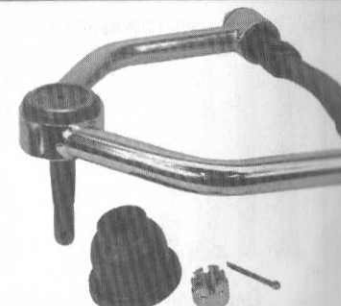

Formed from 7 gauge steel, the same as their Mustang II cross-members, they are super strong. They come complete with the ball joints and bushings installed, and with all the hardware and spacers ready to install.

Economy Upper A-Arms	CA-101-E	\$199
Economy Lower A-Arms	CA-103-E	\$259

For use on all vehicles with Heidt's & most other Mustang II IFS crossmember kits (p. 12-13)

TUBULAR UPPER &

TUBULAR UPPER A-ARMS

Tubular Upper A-Arms are the ultimate in replacement for stock upper-A-arms, providing more strength and appearance. Fits Heidt's and IFS. Arms arrive fully assembled, ready to install joints, bushing and cross shafts.

Tubular Upper A-Arms, Plain	CA-101
Tubular Upper A-Arms, Stainless	CA-101

MUSTANG II 2" BODDED &

STOCK STEEL 5-THUDLER
